## AAES Endocrine Surgery Fellowship Experience Log

| OPERATIVE CASES | Completed | Defined Category Minimums | Advanced endocrine operations[1] |
|---|---|---|---|
| **THYROID** | | **60** | |
| Thyroid lobectomy | | | |
| Total thyroidectomy | | | |
| Other thyroidectomy (i.e. Sistrunk procedure, isthmusectomy, etc.) | | | |
| Reoperative thyroidectomy (previous thyroidectomy/parathyroidectomy)? | | | |
| How many of the above were pediatric (age <18)? | | | |
| | | | |
| **CERVICAL LYMPHADENECTOMY** | | **15** | |
| Central neck lymphadenectomy initial[2] | | **10** | |
| Central neck lymphadenectomy reoperative[2] | | | |
| Lateral neck lymphadenectomy initial[2] | | **5** | |
| Lateral neck lymphadenectomy reoperative[2] | | | |
| How many of the above were pediatric (age <18)? | | | |
| | | | |
| **PARATHYROID** | | **30** | |
| Parathyroidectomy MIP / focused | | | |
| Parathyroidectomy BLE / 4-gland | | | |
| Reoperative parathyroidectomy (previous thyroidectomy/parathyroidectomy)? | | | |
| How many of the above were pediatric (age <18)? | | | |
| | | | |
| **ADRENAL** | | **10** | |
| Adrenalectomy open | | | |
| Adrenalectomy minimally invasive (transabdominal) | | | |
| Adrenalectomy minimally invasive (retroperitoneal) | | | |
| Reoperative adrenalectomy, multivisceral resection, or partial adrenalectomy | | | |
| How many of the above were pediatric (age <18)? | | | |
| | | | |
| **GI NEUROENDOCRINE** | | **N/A** | |
| Pancreas | | | |
| Other GI neuroendocrine tumors (i.e. paraganglioma) | | | |
| How many of the above were pediatric (age <18)? | | | |
| | | | |
| **TOTAL ENDOCRINE CASES** | | **175** | **10** |

| NONOPERATIVE EXPERIENCE | | |
|---|---|---|
| Ultrasound | | **15** |
| FNA thyroid or lymph node | | **5** |
| Vocal cord examination (laryngoscopy or laryngeal ultrasound) | | **N/A** |

[1]Advanced endocrine cases include (but are not limited to) reoperative thyroid/parathyroid/lateral neck surgery, reoperative adrenal surgery, adrenalectomy performed with concomitant multivisceral resection, cortical-sparing adrenalectomy, enteropancreatic neuroendocrine tumor procedures, and pediatric endocrine surgical procedures. Advanced endocrine cases (grey boxes) count towards defined category minimums and total cases.

[2]Central and lateral neck lymphadenectomies can be counted when done concurrent to the index thyroid operation. Both initial and reoperative cases count toward defined category minimums.
