Objectives of the program: please write 2-3 sentences regarding the objectives of your fellowship program.

- To provide clinical knowledge in the full spectrum of Endocrine Surgery including diagnosis, treatment and follow-up of the most common endocrine diseases.
- To provide exposure to clinical and some basic research on molecular biology of endocrine pathology.

4. Highlights of the fellowship: a short paragraph detailing specifics of your program, including surgical and multidisciplinary rotations, case volumes, research opportunities, etc.

Our service operates on more than 200 endocrine patients a year, including thyroid, parathyroid adrenal and endocrine pancreas. The program includes full clinical responsibilities under the supervision of the staff in different activities. Patients at the outpatient clinic are seen once a week; there are 2 surgical days per week. We have hospitalized patients all year around There are 2 academic sessions per week; including discussion of controversial cases in thyroid pathology by our multidisciplinary team. There is also a mandatory animal lab with research

opportunities. Rotations outside the hospital can be arranged at a Pediatric hospital and at the MD Anderson Medical Center in Houston.
